ALUMNI CORNER

Words can't express how happy and grateful. Initially I didn't know, where to start but my professors gave an idea and the wordings to go with. I am thankful for the people who helped me in the journey to achieve my degree and placement. Also, thanks to all my professors that were instrumental in sharing their knowledge so that I can apply it and be a tremendous blessing to others.

I have learned a lot of technical stuff during college days. The staff were co-operative and helpful. The college environment and rules helped to get more discipline and life lessons.

Staff will emphasise and motivate us to study new technologies, extra projects and other academic activities like participating in technical competitions. The labs are good enough to develop our projects and to acquire new knowledge. There are ups and downs in every part of life, but whatever happens, you have to trust and believe in yourself, this thing I learned from my college and staff.

We are Engineers

We the brain behind the beauty.
The soul behind the beast
We have our own style with extraordinary
-lifestyle
We are the ghost with subsequent nightmare.
We create our own filmware
We perform logical, we are Electricals,
We have own tutor, we are Computer,
We don't build brittle, we are Civil,
We look vaguely local, we are Mechanical,
We have water allergy, we are Metallurgy,
We use logical tricks, we are Electronics
We build the nation, to fulfill your
-imagination
We sleep in the morning and wakeup in night

From attendance to existance **we** fight.

We create the world,

We design the world,

We lighten the world.

We always look for invention

with a better intention.
